294 Let P and Q be specifications. Let A be an assertion and let A' be the same as A but with primes on all the variables. Prove the assertion law $P \cdot Q \iff P \wedge A' \cdot A \Rightarrow Q$

After trying the question, scroll down to the solution.

 $\begin{array}{lll} & \text{Let } A^{\prime\prime} \text{ be the same as } A \text{ but with double-primed variables. Then} \\ & P \wedge A^{\prime}. \ A \Rightarrow Q \\ & \equiv \exists \sigma^{\prime\prime} \cdot \langle \sigma^{\prime} \cdot P \wedge A^{\prime} \rangle \sigma^{\prime\prime} \ \wedge \ \langle \sigma \cdot A \Rightarrow Q \rangle \sigma^{\prime\prime} \\ & \equiv \exists \sigma^{\prime\prime} \cdot \langle \sigma^{\prime} \cdot P \rangle \sigma^{\prime\prime} \ \wedge A^{\prime\prime} \ \wedge \ (A^{\prime\prime} \Rightarrow \langle \sigma \cdot Q \rangle \sigma^{\prime\prime}) \\ & \equiv \exists \sigma^{\prime\prime} \cdot \langle \sigma^{\prime} \cdot P \rangle \sigma^{\prime\prime} \ \wedge A^{\prime\prime} \ \wedge \ \langle \sigma \cdot Q \rangle \sigma^{\prime\prime} \\ & \Rightarrow \exists \sigma^{\prime\prime} \cdot \langle \sigma^{\prime} \cdot P \rangle \sigma^{\prime\prime} \ \wedge \ \langle \sigma \cdot Q \rangle \sigma^{\prime\prime} \\ & = P. \ Q \end{array}$ discharge
